

Update

The source of the potential problem has been identified and remedied and it is more limited in scope than originally reported.

Bug Juice International, Inc. issues a voluntary recall on production codes ending in the letter “C” due to possible health risks.

March 18, 2016- Bug Juice International, Inc. announced today that it is voluntarily recalling product due to process deviations that occurred in a co-pack facility not owned or operated by Bug Juice. The deviations were part of the commercial bottle sorting process and could result in contamination by plastic or metal shavings which could be harmful if consumed. **It is important to note that there have been no reports of harm or illness associated with these products to date.** No other production codes or products are affected by this recall.

There are a total of 15,208 cases that are included in the recall which were produced in March 2016 and distributed to 35 wholesalers. The products subject to this recall are bottles or cases marked with a case code that ends with a “C” (example: 6046 C) and bottle code ending in “OBC” (example: DOB 6046 11:22 OBC) and have the following production case codes:

<u>Case Code</u>	<u>Bottle code</u>
6067 C	6067 -OBC
6068 C	6068 -OBC
6069 C	6069 -OBC
6070 C	6070 -OBC
6071 C	6071 -OBC
6074 C	6074 -OBC
6075 C	6075 -OBC
6076 C	6076 -OBC

This recall is being initiated out of an abundance of caution due to the possible contamination of the affected product discovered by the co packer during a regular audit. **The recall is being revised to change the dates of production to the dates listed above.** Bug Juice is working closely with the co-packer and the cause of any potential contamination has been solved. Consumers looking for more information or have questions about the recall should contact Bug Juice at 810-225-3200 between the hours of 8am to 4pm, email recall@bugjuice.com or visit www.drinkbugjuice.com/recall-march-2016.aspx
